

What is the proposed system's operating environment?

- Web?

What problems exist with the current system?

- How are QR codes being generated?

What quality, performance, and security considerations exist for the product?

- i.e. How will students access their grades?
 - Students saving their exams?
- What are SIUE's policies for grades/tests (mainly are we going to be breaking any policies?)

What are the expectations for the QR code/Grade input?

What does the User workflow look like?

Will this software integrate with other SIUE services?
